3. Filter>Render>Expand>Invert>Open>Fade>Apply You can take something and make it something else. Sometimes you want to make light something and dark or blur an image. The filter tool is where you can take a bunch of different images and turn them into something else. Many effects are determined by the use of filters. You can take a picture, open a photo in Photoshop and apply different filters to it to transform it into something else. 4. Select>Deselect You can select an object in your image, but you can also select a certain part of an object in your image. Selecting a part can be useful for much more than just picking objects from your images. You can create an outline of something in the image, for example, using the magic wand tool. 5. Layer>Lock> Unlock If you want to change the order of a layer, you can use the Layer>Lock>Unlock command to move things around. You can also use this command to place layers and objects to change the order. If you lock and unlock an object so it's no longer visible, you can use the Move tool to reposition it. 6. Edit>Undo The Undo command is useful for moving and editing images. If you mess something up, you can undo it by clicking the Undo button. This has the handy side effect of clearing all the changes you've made on an image so you can start over from the beginning. 7. Select>Modify>Erode If you have an object that is too big and you want to make it smaller, you can use the Erode command to make the object smaller. In doing this, you start from the border of the object. 8. Select>Modify>Foreground and Background Colors You can use the Select>Modify>Foreground and Background Colors command to colorize your image. The color of an image can be affected by exposure, shooting location and time of day. This command will make the parts of the image that aren't fully exposed brighter while leaving the parts that are exposed brighter. 9. Select>Modify>Distort>Smooth You can use the Distort

Design Tools Photoshop features an array of tools for creating simple and complex designs. These include the Rectangle Tool, the Ellipse Tool, the Marquee Tool, and the Selection Tool, among others. The Rectangle and Ellipse Tools are great for drawing borders or shapes around an object. The Marquee Tool can be used to select and copy areas of an image. The Selection Tool is used to mark out an area of an image and apply effects to it. Effects Tools Photoshop has dozens of built-in effects tools that you can use to modify images and enhance them. The most frequently used ones are the Burn and Dodge tools. These tools remove or emphasize specific parts of an image, creating a visually striking effect. The Blur Tool and the Smudge Tool can be used to add a layer of blur to parts of an image, thus abstracting its details. Some of the other effects are: •The Fade Tool is used to create different layers of transparency effects. •The Grain Filter adds a layer of grain to an image. •The Sand Tool adds a layer of color variations. •The Smudge Tool is used to soften the edges of a selection and blur it. •The Scratch Tool removes details from an image and add them in a new layer. •The Sponge Tool creates a colorful splash of color across an image. •The Toy Camera Tool makes an image appear as if it was taken with a toy camera. • The Watermark Tool attaches a watermark to an image. •The X-ray Tool makes it easy to highlight parts of an image with other areas of the image. •The Wave Filter creates an iridescent highlight effect. Tools for Specific Tasks Photoshop has a large array of tools designed for specific tasks. Here are some of the more common ones: Raster Effects The most commonly used raster effects are the Brighten and Lighten tools. They're used to brighten, darken, or sharpen a color. The Invert can be used to darken all the colors in an image, and vice versa. The Dodge and Burn tools are great for removing or emphasizing an area of an image. The Reduce and Expand tools are used to resize or shrink or enlarge an image. Filters Photoshop has an array of filters that can alter images. The most common filters are: Blur filters
