Genus: Euphorbia. Species: paratendella. Denomination: SUN-CHILL. The present invention relates generally to a Euphorbia plant named SUN-CHILL, and the plant will be referred to as xe2x80x98SUN-CHILLxe2x80x99 to avoid confusion. SUN-CHILL is a new cultivar of Euphorbia with a large amount of tolerance to cool temperatures, is suitable for use as a ground cover, and is suitable for use in parks, gardens, and other areas where there are many fluctuations in temperatures. The genus Euphorbia is in the family Euphorbiaceae. The species and varieties of plants are known to be difficult to propagate without specialized breeding techniques. The methods of reproduction for this group of plants include reproduction through pollen, and through the use of seeds. Typical known genus and species plants are described herein. There are over 1500 species of Euphorbia which are generally in the family Euphorbiaceae. Some of these species are grown for their spring blooming, and others are grown
