## Pro Evolution Soccer 6 Crack No Cd

the demo files give instructions on how to get it going. i had a couple of problems, such as making the clone files. the first instruction said create the files, but there was no way to start with them. i ended up having to start with a blank template, and then change some properties and save it. having done the first part, i then created the second part. then i got an error "all of the files for the project have been modified. reverting to base version is not possible.". i figured out why, and now i have a working hive. i opened it, and it was a very friendly program. no tutorial or anything, so

---

i just sat and watched the big screen as the program worked. i made a maze on the surface, and then inside. i made some four walls, and then moved a few things around. then i made a door to make a room. after that i went to create the players. i had several options. by default it would have 4 players, but i changed it to 6. i wanted more players, so the program recommended putting a template player on the surface and connecting the players with doors to make a full 7 person room. then the program asked me to create the goal. i chose from a bunch of templates, and then created the goal by drawing lines and creating a hole. i decided to have 2 teams, and

---

had the program setup the difference by color, and names. i tested it and played a game by changing the names. i also had the team names be the team colors. i printed the game, and got it set up. then i went back to the hive and decided i was going to create my own version of a physics lab. for this i used a couple of templates, and then i created the walls, roofs and floors. then i added all the items i thought were necessary. next came the doors. i thought i would put a door in, and connect it to the walls and floor. i built it up a bit. the physics lab was on the third floor.
