MultiClipboardSlots is a program that has the most basic functionality of a clipboard manager. While there are tons of clipboard managers that allow you to store text, you don't want to spend a lot of time switching between applications to paste what you need to paste. So we have decided to take a different approach and make something like that which is only intended for a single user. With MultiClipboardSlots you can create additional temporary clipboards for use in MS Word, the browser, OpenOffice and a number of other applications. MultiClipboardSlots is a simple utility that gives you a clipboard shortcut to the right side of the task bar and a menu option to add a new clipboard. This clipboard will be a text area that stores all the pasted text in the chosen application. Pressing hotkeys can transfer the text to other applications. MultiClipboardSlots lets you add up to 10 different clipboards. Let's say you've got a new document in MS Word and you'd like to be able to copy the text to paste it somewhere else. Simply right-click in the desired place and click on the "Add clipboard" icon. Click on the plus button and choose "Clipboard 1". Now all you have to do is press CTRL+C, open up Word and paste the text to the first clipboard you've created. Simple enough. But if you need more than one clip, just repeat the process and create more clipboards. In our example we have decided to add three different clipboards, so we will need to use up to 10 clipboards. Unfortunately, the operating system doesn't let you create more than one clipboard at the same time. However, with MultiClipboardSlots you can simply add additional clipboards. Each clipboard will have its own set of hotkeys. We have added a custom set of hotkeys and assigned CTRL+C to the first clipboard, CTRL+V to the second and CTRL+X to the third one. And with that we've covered pretty much all the functionality of MultiClipboardSlots. It has a nice, handy and simple interface and you can also create as many clipboards as you want. You don't even need to restart the app to add new clipboards. But it seems that MultiClipboardSlots has only a very basic set of commands. To add data to any

MultiClipboardSlots is an advanced clipboard extender that allows you to store and store unlimited numbers of data in the Windows Clipboard. When you open MultiClipboardSlots, you are prompted to select what you want to do, either you will be able to use the default Windows clipboard or a specific folder. Clipboard behavior is a very important issue, in fact, Windows does not allow more than one slot of data. To get rid of that problem, MultiClipboardSlots allows you to store unlimited numbers of data in the Windows Clipboard. The app can work as a simple clipboard or a clipboard extender, you can freely access both one or multiple files. MultiClipboardSlots allows you to work with anything: from images, sounds, videos, to any type of files (PNG, JPEG, JPG, HTML, TXT, DOCX, RTF, PDF, etc.). MultiClipboardSlots is a free and very simple clipboard manager, but it is a pity that it cannot do some of the most basic things, such as preview stored data, encrypting, deleting, restoring, etc. Description: RapidFox is a program which can be used to run any freeware game (reminiscent of older games such as the Descent series) on Windows 8. \* Access to 10 slots of your clipboard data\* Share data to all your Windows applications using one hotkey\* Portable application; no installation required. Hello, If you're one of those people who find the Windows clipboard very limited and need more than just one slot of copied/stored information,

then MultiClipBoardSlots might be the app for you. It allows you to set and access up to 10 slots of stored information and all with just the touch of a hotkey. The app is very small in size with no special requirements and runs on all modern Windows versions, so the installation process is very fast. Once everything is set up, you can easily access it from the tray menu. Rapidly store data in 10 additional slots using just a hotkey After you open the MultiClipBoardSlots window, you'll notice a very important feature: with just a few clicks you can customize the hotkeys that later on will help you copy/paste data. You'll will not be able to choose more than one modifier (CTRL/ALT/WIN), but that's probably enough for most users. As you'll start using the app, you'll surely notice that using the copy hotkeys will also change the Windows clipboard, so always keep that in mind when using them. Nifty clipboard addon with some noteworthy disadvantages As a bonus, this tiny utility is able to fully emulate the clipboard feature, therefore you can use it to store not only text, but also images and objects. Unfortunately, once something is copied to one of the slots, you will not be able to preview it in any way, so you'll have to remember what exactly is stored in each slot. Furthermore, if you restart the program, data stored in your slots will no longer be available, so there's no way to store the information - neither locally, nor in the cloud. Fortunately, the app is portable, so you can move it from one workstation to another without losing your settings. A very useful, but basic clipboard extender If you're looking for a clipboard organizer, you might want to find another solution, since advanced or even useful features like slot preview, data retention/processing/encryption are not available. MultiClipBoardSlots is a very basic clipboard extender, it frees you from the operating system's limitations by offering additional slots, but nothing more. Hello, If you're one of those people who find the Windows clipboard very limited and need more than just one slot of copied/stored information, then MultiClipBoardSlots might be the app for you. It allows you to set
