Portable SoftMaker Office Crack +

What's New in the Portable SoftMaker Office?

SoftMaker Office is a powerful office software suite, containing a word processor and a spreadsheet. Portable SoftMaker Office was developed with the aim of allowing the user to save the package to any available hard disk and then click any of the two executables to run it, without the need to install it on a local machine. Thus, Portable SoftMaker Office is portable in the sense that it can be run on any machine on which a floppy disk or USB device can be inserted, without the need for additional installation. In addition, Portable SoftMaker Office has a graphical interface, which is familiar to the ones of other office suites, such as Microsoft Office or LibreOffice. The UI looks very similar to the

one of Microsoft Office, however, the text parts are slightly different. More in general, both the word processor and the spreadsheet are rather good, in the sense that they offer support for the most common document formats and integration with popular office packages. Regarding the features offered by SoftMaker Office, they can be found in this section. The word processor: - TextMaker offers support for Microsoft Word (DOC, DOT), OpenDocument text (ODT), RTF, Pocket Word - Pocket and Handheld PC (PSW and PWD), HTML 4.0, and others. - Objects can be easily manipulated by entering object mode. An additional toolbar appears on the upper part of the screen, allowing you to insert text, picture and OLE object frames, along with equation editor items. Furthermore, you can draw lines, curves, straight, elbow and curved connectors, and so on. - There are support for the following format options: character and paragraph formatting, setting the margins, format tabs, background colors, print margins, styles, cross references, tables and table objects, SmartText entries, indexes, page numbering, chapter formatting. - TextMaker offers support for the following features: Insert images, placeholders, insertion of formulas, spelling checker, Microsoft Office calculation, tables, input fields, SmartText entries, cross references, merge fields, tables, worksheets, links, charts, formulas,

and calculation. - SoftMaker Office supports Microsoft Excel, and it offers support for XLS, RTF, DBF, DIF, TXT, and others. Some previously described formatting attributes apply here as well. More in general, the word processor is a powerfull tool that has proved to be reliable and fairly easy to use. The spreadsheet: - PlanMaker is similar to Microsoft Excel, and it offers support for XLS, RTF, DBF, DIF, TXT, and others. Some previously described formatting attributes apply here as well. - Some of the features offered by PlanMaker: Insert functions, comments, symbols, SmartText entries, page break, header and footer, cross references, table of contents, bibliography and database fields, editing of fill lists, indexing
