Of course, even if the CMS technology and new tools are not familiar to you, you can always click “Learn more” or “See inside” and the help system will take you through the tools. There is also a brief overview of how to use Photoshop Elements 2020 right on the banner on the home page of the site, but if you need to find this overview, the help system will take you there. You can bookmark the help system like a browser bookmark, and I found that to be the simplest way to find my way back to it after various time passes. You can now organise Elements in multiple ways, as you can do with Lightroom. I like the “Library” view the best, since I can see a list of all the files in the folder. When I work on an image in Adobe Air, I can also zoom in easily from the objects on the canvas to the artwork file. Of course, there is a downside to all of this, and that is the increase in the price of software. The previous version of Photoshop Elements (PSE 13) used to run you \$79.99 and this version (2023) adds about \$20 to that price. There is a 30-day free trial. The upgrade will also require a reboot. Once you’ve tried out the preview version, it’s time to buy the product. In my case, I’ve been using the \$79.99 “PowerSmack” version. I like this one because it offers good value and the ability to update the free trial version. Something else that was missing from Lightroom is the ability to import, process and save to JPEG 2000 formats. JPEG 2000s are becoming an ideal storage solution for those using the photographer's standard format and those who fall into the skilled photographer category. This raw converter for those with an existing or potential interest in Nikon DSLRs does include “shop grade” presets, so individual Nikon camera profiles can be generated for certain uses. But the transparent JPEG 2000 import in Lightroom is completely lacking, something that they’ve done with JPGs. On top of that, there isn’t a layers dialog like there is in Photoshop Elements, which makes it quite unpractical to work with. I guess I would have to find and use my own solution. It’s a shame, considering the functionality and social features of such a free and easy to use tool.
